

HAILEY THOMAS

Computer Science Student

<https://www.linkedin.com/in/haileyrthomas/>

ABOUT ME

I'm currently a junior attending the University of Houston – Clear Lake. I'm a Computer Science major and plan on graduating in May 2024 with a Bachelor of Computer Science. For the past seven years, I've been academically determined and willing to make sure I achieve greatness and go the extra mile. Some of my strengths include being a hard worker, dedicated, self-motivated, organized, and working well under pressure. My weaknesses are that sometimes I am overly ambitious and take on too much at once, I can be very hard on myself to succeed, and I tend to be a perfectionist. I am currently attending the University of Houston - Clear Lake and studying Computer Science with a Data Analytics concentration.

Current News

HAILEY'S LIFE

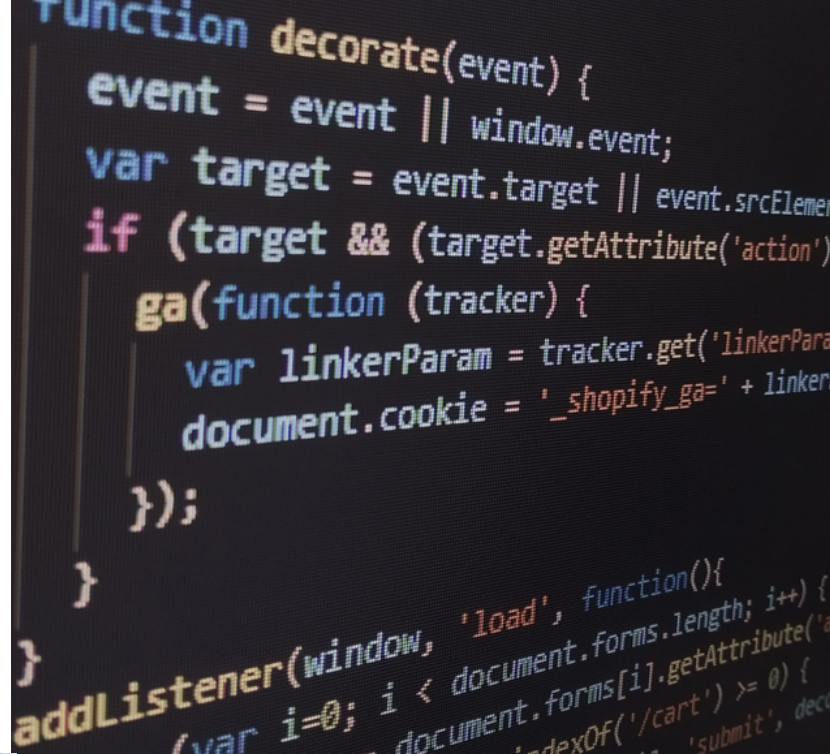

While I am currently attending UHCL, I am a member of the Black Student Association and the National Society for Black Engineers. I am currently learning more about Computer Science and coding. So far I have learned three programming languages: Python, JavaScript, and Java. I am also attending various women in STEM conferences, finding internships to find her passion in Computer Science, and coding projects to gain experience and learn more about programming.

ACADEMIC SUCCESS

PRIOR TO COLLEGE

During middle school, I attended the Young Women's College Preparatory Academy. They highly encouraged young women to pursue careers in STEM, so from a young age I was interested in STEM careers. I took an Information Technology class in eighth grade and my sophomore year, a PAP Computer Science course my junior year, and an AP Computer Science A to help further my interests in Computer Science and get more experience with coding. With my curiosity for Computer Science, I took edX courses, worked on coding on Minecraft with my school, and coded on code.org many times during school. I graduated in May 2021 from Shadow Creek High School with a GPA of 3.67, where I was also a Dual Credit student attending Alvin Community College.

PAST EXPERIENCE

LEADERSHIP

I've also been a member of the Girl Scouts of San Jacinto County for 12 years. I've earned my Bronze Award, Silver Award, and Gold Award. As a Lifetime Member of Girl Scouts, I aspire to inspire young girls to not only pursue careers in male-dominated fields but to complete their Gold Award just like I did.

What I want for myself

THE FUTURE OF HAILEY

During college, I hope to study abroad and do research projects to further my Computer Science interests. I plan to attend the University of Houston - Downtown to obtain my Masters of Science in Data Analytics, to later pursue a career as a Data Analyst. I wish to intern/be employed at Intel, Microsoft, Apple, Dell, IBM, the federal government, or anywhere that will help me gain experience in Computer Science. I will use the same leadership mindset I've gained from Girl Scouts to obtain my bachelor's degree in Computer Science. With my degree, I plan on solving my community's problems and I would travel and work on projects to help people in other countries. I feel like a very well-rounded student. With my involvement in many different extracurriculars and clubs, my volunteer experience, and my academic experience throughout high school and college, I am willing to inspire and influence many other future students to become over-achievers and well-rounded.
